

The Sri Sathya Sai Baba Organisation of Italy has created this unique Bhajanavali CD-ROM series in order to ease the learning of Bhajans for western devotees.

The CD-ROM format permits real-time consultation and listening of your desired audio section. In the Italian and English versions with chords, simply click on the desired point of the text, Bhajan or glossary to listen to it.

Thanks to the Mp3 player software, many possibilities exist for organising the various sequences of the Bhajans. The Bhajanavali is available in Italian and English versions - with or without chords. Consisting of:

<b>Instructions for using</b>	<b>the Bhajanavali</b>
(A complete reading is recommended)	
<b>I Mantras</b>	ENG
<b>Description of main</b>	<b>Hindu divinities invoked</b>
<b>400 Bhajans</b>	ENG
<b>40 Italian Songs</b>	
<b>Sanskrit Glossary</b>	

As there are over 400 Bhajans, it is not possible to have them all on one CD. Therefore, please be careful when utilising the CD's according to the following Bhajan numbers:

il **CD n° 1** for Bhajans 1 to 208

il **CD n° 2** for the remaining.

For those of you having enough free space on your hard disk, copy all 2 CD's on to it. In this case however, it is necessary to follow the directory contained in the CDs.

[Harmonium - Advanced Method v.1.0](#)

This method was conceived to simplify the learning method of how to accompany Bhajans,

and it is aimed at both beginners and those who already have some knowledge of the use of chords.

In general, anyone beginning to accompany Bhajans invests great energy in learning each individual Bhajan without realising that many of them use the same harmonic sequences, that is, the same chords organized in a different way and often in another key. Practicing with this method will develop the ability to accompany Bhajans using the sensitivity acquired through practice without having to follow the score.
